[MS in AI Engineering \(Quantic\)](#)

[Executive Education Certificate: AI for Business \(Quantic\)](#)

[MBA in Leadership & Management, Executive MBA in Strategic Leadership at Valar Institute](#)

- **Program Focus:** A rigorous, graduate-level degree focused on designing, building, deploying, and scaling intelligent systems. Covers AI engineering fundamentals, machine learning, cloud-based architectures, and production-ready AI applications.
- **Who It's For:** Software engineers, technical professionals, and career switchers seeking deep, practical AI expertise, as well as technical leaders looking to strengthen their AI engineering capabilities.
- **Program Length:** Approximately 13 months, fully online and designed to be completed alongside full-time work.
- **Program Focus:** A short, intensive executive certificate focused on understanding AI's impact on business strategy, productivity, and organizational transformation. Covers AI use cases, adoption frameworks, risks, and leadership considerations.
- **Who It's For:** Business leaders, managers, consultants, and professionals who want practical AI literacy without a technical or coding background.
- **Program Length:** Approximately 2 months, fully online and designed for busy professionals.
- **Program Focus:** Accredited, AI-accelerated business degrees emphasizing leadership, management, strategy, and real-world decision-making. Programs blend core business fundamentals with modern leadership skills for a global, fast-changing economy.
- **Who It's For:** High-potential early- to mid-career professionals (MBA) and experienced managers, entrepreneurs, and senior leaders (Executive MBA) seeking a flexible, globally oriented U.S.-accredited degree.
- **Program Length:** 12 months, fully online, mobile-first, and compatible with full-time employment.
